About this template

Website wireframe

A website wireframe is a mockup of a website. Following these steps will help build out a map of the navigation and main points of a new website design while adding in visual and interactive elements

HOW TO USE THIS TEMPLATE

1. Briefly describe who your audience is, what problem you are trying to solve fo them, what the goal of this website is, and how you plan to measure success.
2. Start with your header and main navigation at the top.
3. Add a hero section. What does your website showcase? Add additional sections and alternate the look and feel. Perhaps feature collections, an image gallery, or a content feed.
4. Wrap it up with your footer. Make sure to include contact information and any page links that you did not include in the main navigation.

GOOD FOR

- Aligning you team
- Quick visualizations

PEOPLE

2 to as many as you want!
